

Solid experience creating appealing web interfaces thanks to my solid understanding of cutting-edge web technology. Due to my adherence to industry standards, my work is performance, accessibility, and responsiveness optimized, resulting in an exceptional user experience.

# BACKGROUND

**Cressco** Remote

## Front-end Developer & QA Tester

August 2023 - Ongoing

I've been instrumental in improving user experiences on several online projects, making a big contribution to cutting-edge web solutions.

- **E-commerce Integration:** Contributed to Shopify integration projects, improving online stores and enhancing customer shopping experiences.
- **Performance Optimization:** Applied best practices and optimizations for faster load times and improved site performance.
- **Automated Testing:** Used Cypress and Jest for automated testing to ensure code quality and reliability.
- **Documentation:** Maintain detailed documentation of design decisions, workflows, and updates for the reference of the development team.
- **Cross-Functional Collaboration:** Worked closely with cross-functional teams, including designers and backend developers, to bring web projects to life.

### Objectives and Goals:

- Prioritize client satisfaction by proactively engaging in feedback sessions, understanding client requirements deeply, and ensuring our web solutions align perfectly with their vision and objectives.
- I strive to stay updated with emerging web tech and trends to keep our projects innovative and competitive.
- Elevate the quality assurance process by implementing robust testing methodologies, identifying potential bottlenecks, and proactively addressing issues to ensure flawless web applications.
- Advocate for and implement web accessibility standards, ensuring that our digital products are inclusive and user-friendly for individuals with diverse abilities.

### Tech Stack:

React with JavaScript - TypeScript V +17.0.2 Gatsby.js V 4.0.0 Jest V +29.6.2

Cypress V +12.17.3 Axios V +1.4.0 Graphql V 1.0.1 Zod V 3.21.4 Zustand V 4.3.8

Tailwind V 3.3.2 Sass V 1.69.2 React Query V 4.29.12 Next.js V 13.4.4

**Patitas a Casa** Remote

## Front-end Developer & Designer

March 2023 - July 2023

I played a pivotal role in creating a user-friendly web application dedicated to rescuing, locating, and adopting pets.

- **Responsive Web Design:** Develop and maintain a responsive design to ensure that the platform is accessible and user-friendly on various devices.
- **Optimization:** Continuously optimize the user interface for speed, performance, and SEO, ensuring high visibility for the platform.
- **Problem Solving:** Identify design challenges and provide creative solutions to enhance user engagement and pet adoption rates.

### Objectives and Goals:

- Implement eco-friendly design practices and promote sustainability in the pet care industry.
- Build partnerships with pet shelters, veterinarians, and pet product suppliers to create a comprehensive ecosystem for users.
- Actively engage with the pet care community through participation in industry events, seminars, and collaborative forums, fostering relationships and exchanging insights for mutual benefit.

### Tech Stack:
